mtrack

Anti-theft devices don't always prevent theft

Each year in the UK alone, the number of stolen cars, motorcycles, caravans, motor homes, HGV's and plant machines, exceeds 300,000.

Many of these thefts occurred despite the use of alarms, immobilisers, wheel clamps and other deterrents. These being of little use against a skilled thief.

Shrewd owners are safeguarding their property with after theft recovery systems. Unfortunately some of these systems promise much but often fail to deliver.

mtrack is a NEW BREED of wireless after theft recovery system

Designed as a security product from day 1, it needed to be small, completely wireless, yet last several years between battery changes. It needed the ability to be mounted just about anywhere and it needed to work undercover.

The result is the most effective after theft recovery system available. No other system can match mtracks 100% success rate across the entire range of applications.

mtrack protects cars, lorries, trailers, motor homes, caravans, boats, motorbikes, plant, palletised loads, cash in transit, agricultural vehicles and machinery... the list is endless.

mtrack will attract insurance premium discounts and help to preserve your no claims bonus. mtrack can also be transferred quickly and easily.

The built-in motion sensor can protect vehicles even when stolen using the owner's keys, alternatively you can simply call the 24/7 monitoring station to report a theft.

With a crime reference number and your authorisation, our dedicated finder network will have just one objective... to find your stolen property. Once found, we remain on watch until the police arrive.

Product Features:

- 100% Recovery rate in 2005
- Insurance Discounts of up to 25%
- No Installation, No Wiring and No Antenna
- Thatcham Approved
- Sold Secure (Gold) Accreditation
